# The operating system of the Tanzanian school.

TZS 200,000,000 FOR 20%

ATLAS IS SCHOOL MANAGEMENT SOFTWARE BUILT IN TANZANIA, FOR TANZANIA. FEES AND ARREARS, ATTENDANCE, MARKS AND REPORT CARDS, PAYROLL, AND THE MESSAGES THAT REACH PARENTS. WEB, ANDROID AND IOS. ONE ANNUAL PRICE FOR THE WHOLE SCHOOL.

# 2026 in Numbers

A LAUNCHED PRODUCT, FOUR SCHOOLS IN ONBOARDING ACROSS FOUR REGIONS, AND A MARKET WHERE NINE IN TEN PRIVATE SCHOOLS STILL HAVE NO SYSTEM AT ALL.

## 4

SCHOOLS ONBOARDING NOW

KARATU, DAR ES SALAAM, ARUSHA AND ZANZIBAR. FOUR REGIONS, NOT ONE CITY.

## 5,289

PRIVATE SCHOOLS IN TANZANIA

THE REGISTERED NON-GOVERNMENT SCHOOL ROLL. TZS 13.2BN A YEAR AT OUR PRICE.

## 80%

GROSS MARGIN PER SCHOOL

TZS 2.5M IN, ROUGHLY TZS 510K OF SMS, HOSTING AND AI OUT.

## 9

MONTHS TO A LIVE PRODUCT

25 MODULES, 48,000 LINES OF APPLICATION CODE, AFTER 18 MONTHS OF RESEARCH.

# A school is a business being run out of exercise books.

TANZANIA'S PRIVATE SCHOOLS COLLECT BILLIONS OF SHILLINGS A YEAR AND ACCOUNT FOR ALMOST NONE OF IT IN A SYSTEM. THE HEAD TEACHER CANNOT SEE TODAY WHAT THE SCHOOL IS OWED. THE PARENT FINDS OUT AT THE END OF TERM.

- **Nobody agrees on the arrears figure.** Fees live in a ledger book and three spreadsheets. Ask the bursar, the head and the board, and you get three numbers.
- **Parents hear about absence at the end of term.** By then the child has missed six weeks and the school has lost the chance to act.
- **Report cards take weeks of evenings.** Mark sheets are copied by hand, totalled by hand, and ranked by hand, every term, for every stream.
- **Payroll and PAYE are computed manually.** The mistake is found by the TRA, not by the school.
- **The software that exists bills per student.** Growing costs you more, and SMS, email and AI are separate contracts the office has to negotiate alone.

# One system of record for the whole school, with everything already in the box.

Fees & immutable ledger

Attendance

Marks & report cards

NECTA

Payroll & PAYE

Timetable

Parent SMS

Library, hostel, transport, clinic

**20,000**

PLATFORMS

### Web app · Android · iOS

A teacher marks a register on a phone. A parent only ever meets Atlas as a text message. Both are built.

FINANCIAL INTEGRITY

### Immutable double entry ledger

Money records cannot be edited. A correction is a reversal, so the audit trail is the truth a board can rely on.

MULTI TENANCY

### Row level isolation, per school

Every query is scoped server side and the database enforces it again underneath. One school can never see another.

# Five people, five dashboards, one set of numbers.

MOST SCHOOL SYSTEMS ARE BUILT FOR THE OFFICE AND LEAVE EVERYBODY ELSE OUTSIDE. IN ATLAS EVERY ROLE SIGNS IN TO A VIEW BUILT FOR THEM, AND EVERY VIEW READS THE SAME RECORD.

## 01

### Head teacher & director

Collections against target, arrears by class, attendance today, results by stream, staff cost.

## 02

### Accountant & bursar

Invoices, receipts, instalments, the debtors report, payroll and PAYE, a ledger that reconciles.

## 03

### Teacher

Register on a phone, marks entry, report card comments, timetable, lesson plans and quizzes.

## 04

### Parent

Their child's fees, attendance and results, by app or by SMS, so a basic phone still works.

## 05

### Student

Timetable, assessments and results, on the same account the school already issued.

- Web app
- Android
- iOS
- SMS, for the parent with no smartphone

All five roles, all three platforms, shipped.

# AI native, not AI assisted.

The competition sells you software and then sells you an AI add on. Atlas was designed around the agent from the first migration, which is why it can operate the school rather than chat about it.

**25**

MODULES THE ASSISTANT CAN OPERATE

**0**

FINANCIAL FIGURES THE MODEL IS ALLOWED TO COMPUTE

EVERY MODULE SHIPS WITH READ TOOLS AND, FOR ITS WRITE FLOWS, PROPOSABLE ACTIONS. A MODULE THE AGENT CANNOT OPERATE IS TREATED AS INCOMPLETE. THAT RULE IS WRITTEN INTO OUR ENGINEERING CONVENTIONS.

- **It plans and marks.** Lesson plans, quizzes and question papers generated against the Tanzanian syllabus, in the teacher's own subject and stream.
- **It answers in plain language.** "Which Form Two parents owe more than 300,000?" returns a real list, from the real ledger.
- **It cannot invent a number.** Financial answers are computed by the reporting engine and reconciled to the ledger. The model is never allowed to do the arithmetic.
- **It cannot leak.** The model reaches data only through a fixed tool catalogue, permission checked on every call, with the school identity taken from the server and never from the prompt.
- **It cannot act alone.** Writes run propose, confirm, execute. A human confirms every change and the confirm step is not reachable by the model.

# The window is open and it does not stay open.

FOUR THINGS HAD TO BE TRUE AT THE SAME TIME FOR THIS TO WORK, AND 2026 IS THE FIRST YEAR ALL FOUR ARE. THE INCUMBENT HAS HAD TEN YEARS AND HAS REACHED NINE PERCENT OF THE MARKET. THE NEXT FIVE YEARS DECIDE THE REST.

## 01

### Parents are reachable

Mobile penetration and mobile money mean a parent can now be told what is owed and pay it from the same phone, in the same hour.

## 02

### AI got cheap enough to include

Two years ago, bundling an assistant into a TZS 2.5m annual plan would have destroyed the margin. Today it costs us under TZS 100k a school a year.

## 03

### Per student pricing has become a liability

The incumbent bills TZS 9,000 a head, and a school on it pays around TZS 5.5m a year once the add ons are counted. Every school that grew has watched that bill grow with it.

## 04

### Digital records are becoming expected

Examination submissions, candidate exports and record keeping are moving to structured digital formats. Paper is running out of time.

# 5,289 private schools. Nine in ten have never been sold to.

AT ONE FLAT ANNUAL PRICE OF TZS 2.5M, THE REGISTERED NON GOVERNMENT SCHOOL ROLL IS A TZS 13.2 BILLION A YEAR SOFTWARE MARKET THAT IS TODAY ALMOST ENTIRELY UNSERVED.

MARKET SIZING, ANNUAL RECURRING REVENUE

● **490** ShuleSoft, 9.3%  ○ **1,150** Atlas, year five plan  ● **3,649** still open

# One competitor. Less than half the price.

SHULESOFT IS THE ONLY SERIOUS INCUMBENT, WITH ROUGHLY 490 SCHOOLS AFTER ABOUT A DECADE. OUR RESEARCH PUTS A SCHOOL ON SHULESOFT AT AROUND TZS 5.5M A YEAR ONCE THE MESSAGING AND THE ADD ONS ARE COUNTED. ATLAS IS TZS 2.5M, AND THE ADD ONS ARE ALREADY INSIDE IT.

WHAT ONE SCHOOL PAYS FOR SCHOOL SOFTWARE, PER YEAR, TZS

**3,000,000**

TZS SAVED, PER SCHOOL, EVERY SINGLE YEAR

That is TZS 15,000,000 over a five year relationship, on one school.

| | SHULESOFT | ATLAS |
|---|---|---|
| What a school pays a year | ~TZS 5,500,000 | TZS 2,500,000 |
| How it is priced | TZS 9,000 per student | Flat, whatever the size |
| SMS to parents | Bought separately | 20,000 a year included |
| Email | Bought separately | 1,000 a year included |
| AI assistant | External add on, if at all | Built into the core |
| Custom features | Chargeable project work | 10 a year included |
| **Schools today** | **~490** | **4, onboarding** |

A PRICE WAR HURTS THEM MORE THAN US. THEIR MESSAGING AND AI ARE BOUGHT FROM THIRD PARTIES AT RETAIL AND MARKED UP. OURS ARE WHOLESALE INPUTS SITTING INSIDE AN 80% GROSS MARGIN.

# Every school pays TZS 2.5M up front and costs us 510,000.

BILLED ANNUALLY IN ADVANCE, SO A SIGNATURE IS CASH IN THE BANK ON THE DAY, NOT A RECEIVABLE. THAT IS WHAT MAKES THIS BUSINESS FUNDABLE AT THIS SIZE.

WHERE ONE SCHOOL'S TZS 2,500,000 GOES

COST OF SERVICE, PER SCHOOL PER YEAR

| | |

# Four schools, four regions, in onboarding today.

**10M**

TZS CONTRACTED ANNUAL VALUE

**4**

REGIONS, NOT ONE CITY

## 01

### Tumaini Junior Academy

KARATU, ARUSHA

Northern corridor. The reference school for the Arusha and Manyara push.

## 02

### East Africa School

MIKOCHENI, DAR ES SALAAM

The commercial capital, and the densest concentration of private schools in the country.

## 03

### Green Valley School

ARUSHA

A second Arusha site, which proves the model repeats inside one region.

## 04

### Trifonia Academy

ZANZIBAR

Island market with its own examination and administrative rhythm, handled by the same system.

EVERY ONE OF THESE FOUR WAS WON FOUNDER LED, WITH NO SALES TEAM, NO MARKETING SPEND AND NO REFERENCE CUSTOMER TO POINT AT. THAT IS THE NUMBER THIS ROUND IS BUILT ON: THE PRODUCT SELLS ITSELF IN THE ROOM. WHAT IT LACKS IS PEOPLE TO CARRY IT INTO THE OTHER 5,285 ROOMS.

18 MONTHS OF RESEARCH. 9 MONTHS OF BUILDING. ZERO SHILLINGS OF OUTSIDE CAPITAL TO DATE.

# The product is finished. We are buying feet.

Tanzanian schools do not buy software from a website. They buy it from a person who came to the office, sat with the bursar, and imported last term’s spreadsheet in front of them.

- **Region by region, not everywhere at once.** Dar es Salaam, Arusha, Mwanza, Dodoma and Zanzibar first. Reps live where they sell, so travel cost stays low and follow up is same day.
- **The demo is the pitch.** We import the school’s own spreadsheet during the meeting and show them their own arrears figure. Nobody has ever shown them that number before.
- **Reference led inside a region.** Head teachers talk to each other constantly. One signed school in Karatu is an introduction to the next five, at no acquisition cost.
- **Associations and school networks.** Many private schools sit inside groups, dioceses and owner networks. One relationship puts several campuses on the system at once.
- **Onboarding is the retention plan.** Once a school’s students, guardians, fee structures and ledger live in Atlas, year two is a renewal conversation, not a sale.

**5**

FIELD REPS IN YEAR ONE

**1**

SCHOOL PER REP PER MONTH

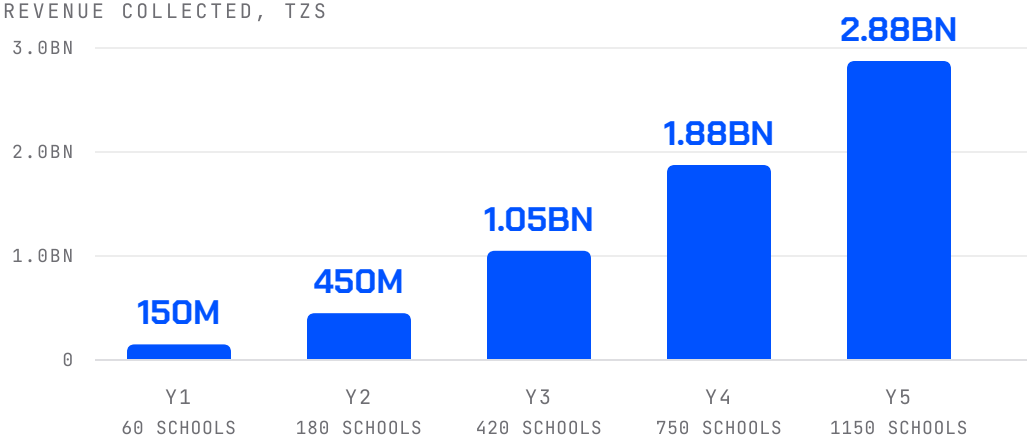

**60**

SCHOOLS BY MONTH TWELVE

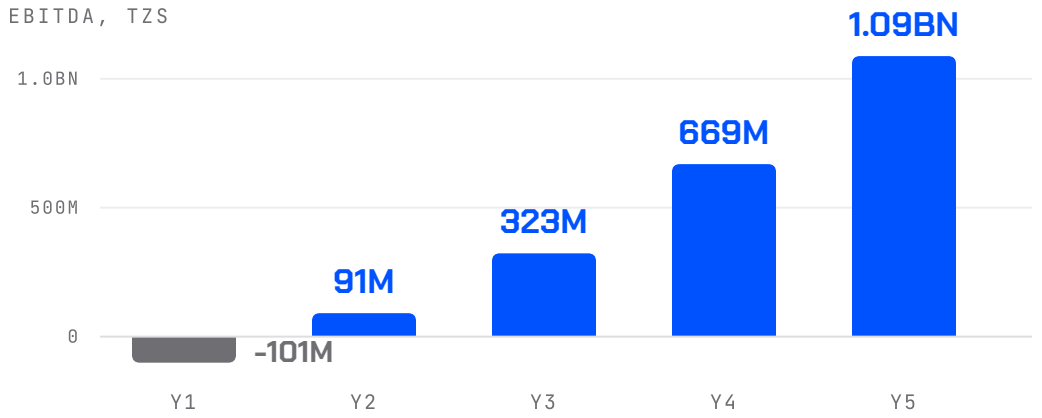

# Cash positive in year two.
## TZS 1 billion of profit by year five.

BUILT BOTTOM UP FROM ONE NUMBER: A REP WHO SIGNS ONE SCHOOL A MONTH. NOTHING HERE NEEDS A VIRAL LOOP OR A MIRACLE.

REVENUE COLLECTED, TZS

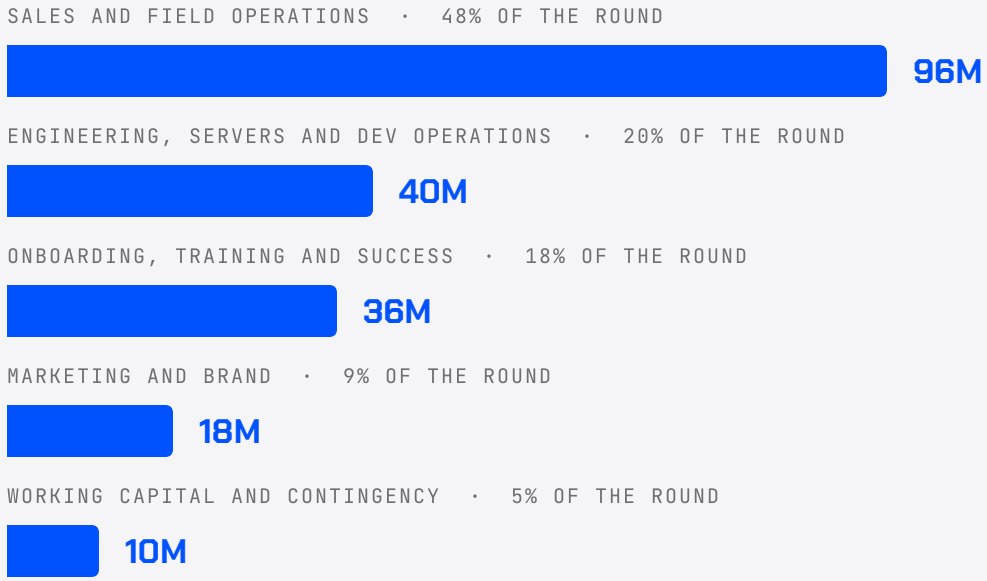

EBITDA, TZS

| TZS MILLIONS | Y1 | Y2 | Y3 | Y4 | Y5 |
|---|---|---|---|---|---|
| Schools at year end | 60 | 180 | 420 | 750 | 1150 |
| Revenue collected | **150M** | **450M** | **1.05BN** | **1.88BN** | **2.88BN** |
| Cost of service | 21M | 69M | 167M | 306M | 487M |

| **EBITDA** | **-101M** | **91M** | **323M** | **669M** | **1.09BN** |

# TZS 200M, and roughly seven shillings in ten go into selling.

THE BUILD IS PAID FOR. THIS MONEY IS DISTRIBUTION, THE PEOPLE WHO INSTALL AND SUPPORT IT, AND THE SERVERS THAT CARRY IT.

**Sales and field operations 96M**
Five field reps and a sales lead, twelve months of salary, commission, travel and devices.

**Engineering, servers and dev operations 40M**
Production infrastructure, monitoring, the SMS and AI float, and a second senior engineer.

**Onboarding, training and success 36M**
Two onboarding specialists, school visits, training materials and the data import service.

**Marketing and brand 18M**
Digital, regional education events, print for the office wall, and the founding school programme.

**Working capital and contingency 10M**
Legal, data protection compliance, and the buffer every first year needs.

Twenty four months of runway on this plan, because year one revenue of TZS 150m covers most of year one operating cost by itself.

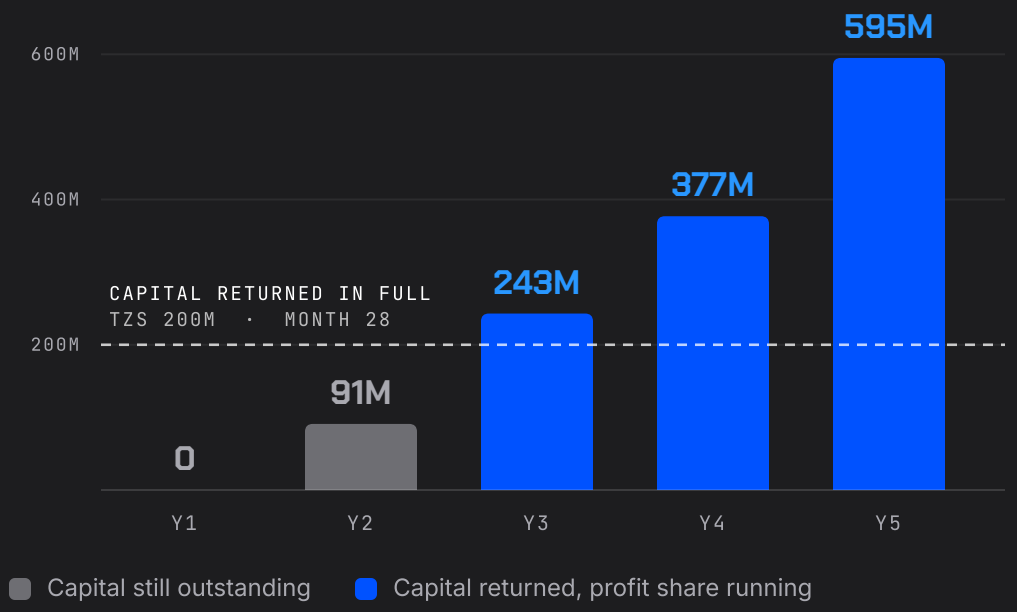

# TZS 200,000,000 for 20%, with your capital paid back first.

**1.0BN**
TZS POST MONEY VALUATION

**3.0×**
CASH RETURNED BY YEAR FIVE

**9.5×**
CASH PLUS EQUITY AT A 6× EBITDA MARK

CUMULATIVE CASH DISTRIBUTED TO THE INVESTOR, TZS

- **Capital first, in priority.** From the first shilling the business can distribute, 100% goes to you until the whole TZS 200,000,000 is back in your hands. We take nothing until then.
- **Then 80 / 20, permanently.** Once capital is returned, distributions split 80 to the founders and 20 to you, for as long as you hold the stake.
- **Honest timing.** Year one is the investment year, so there is no profit to distribute. On this plan repayment starts in year two and completes in month 28. We would rather show you that than promise twelve months and miss it.
- **You still own 20% afterwards.** The capital return is a repayment of your money, not a buy back of your shares. At year five that stake sits on TZS 1.09bn of annual EBITDA.

# What could go wrong, and what we have already done about it.

EVERY ONE OF THESE IS A QUESTION YOU WERE GOING TO ASK. WE WOULD RATHER ANSWER IT ON OUR OWN SLIDE THAN IN THE SILENCE AFTER YOURS.

| RISK | OUR ANSWER |
| --- | --- |
| Only four schools so far | All four were closed founder led with no sales team and no reference customer. They sit in four different regions, which is the hardest version of the test. The round exists to turn one closer into six. |
| Schools pay late | We bill the full year in advance, at the start of the academic year when school fees have just been collected. A signature is cash on the day, not a receivable to chase. |
| The incumbent cuts its price | They buy messaging and AI from third parties at retail and resell them. We buy the same inputs wholesale inside an 80% gross margin. A price war costs them more per school than it costs us. |
| Key person dependency | A senior engineer is the first technical hire in this plan. The codebase already carries written engineering conventions, 25 automated end to end test suites and a documented migration history, so a second pair of hands is productive in days. |
| Data protection and regulation | We hold children’s records, so this is treated as a gate, not a task. Compliance work, the data processing agreements and the terms are funded out of this round before the sales push scales. |
| Connectivity and power | Native Android and iOS apps rather than a browser only product, and SMS as the parent channel, so the parent with no smartphone and no data bundle still gets the fee reminder. |

# What your money buys, quarter by quarter.

HOLD US TO THESE. EACH ONE IS A NUMBER YOU CAN CHECK WITHOUT TAKING OUR WORD FOR IT.

MONTHS 1 TO 3

## 15

SCHOOLS LIVE

Five field reps hired, trained and selling. Payment gateway webhooks live so fees reconcile automatically. Founding school programme opened.

MONTHS 4 TO 6

## 30

SCHOOLS LIVE

Two onboarding specialists in post. Production infrastructure hardened, monitoring and alerting in place, and a full backup restore drill completed and documented.

MONTHS 7 TO 9

## 45

SCHOOLS LIVE

Second senior engineer hired. Data protection compliance and processing agreements completed. Second region reaches ten schools, which proves the playbook travels.

MONTHS 10 TO 12

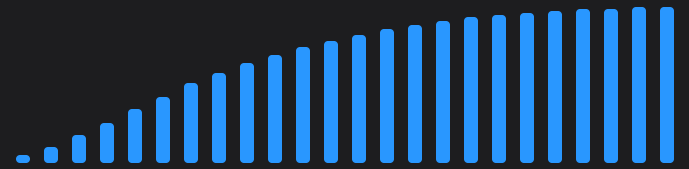

## 60

SCHOOLS LIVE

TZS 150,000,000 collected. Monthly operations at break even. Renewal rate on the founding cohort measured and reported to you.

- Board reporting every quarter
- Monthly collections and school count, in writing
- Open books on the capital return account

# Join us in building what every school runs on.
